NUR MOHAMMED RAJIN

SOFTWARE ENGINEER

Dhaka, Bangladesh | +8801924779105 | rajin0619@gmail.com
nmrajin.github.io | github.com/nmrajin | linkedin.com/in/nmrajin

PROFESSIONAL SUMMARY

Software engineer and CSE graduate focused on full-stack web applications, business software, and connected-device dashboards. Professional experience spans software development, ERP support, QA testing, technical documentation, and user training. Project work includes commerce platforms, vehicle diagnostics, operational dashboards, and offline-first mobile workflows.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, PHP, C/C++, SQL

Web: React, Next.js, Astro, HTML/CSS, Tailwind CSS

Backend & databases: Django, Django REST Framework, PostgreSQL, MySQL, SQLite, Supabase

Mobile & delivery: React Native, Expo, PWAs, Git/GitHub, Docker, Nginx, Linux, Cloudflare, Redis, Celery

Quality & support: QA testing, software troubleshooting, ERP support, documentation, user training

Design & productivity: Figma, Adobe Creative Suite, Microsoft Office, Google Workspace

PROFESSIONAL EXPERIENCE

Software Engineer March 2025 – Present

Datasoft Manufacturing & Assembly Inc. Limited

- Develop and maintain software solutions as part of the engineering team, applying Python, JavaScript, and related technologies to product and internal software needs.

Support Engineer June 2024 – December 2024

Nonagon Infolytic | Dhaka, Bangladesh

- Performed data entry and QA testing to support accuracy and reliability across software processes.
- Resolved customer issues and contributed findings to the product feedback loop.
- Prepared and maintained technical documentation for ongoing operations and internal processes.

Web Development Intern March 2024 – June 2024

Artifex | Dhaka, Bangladesh

- Supported ERP operations through user data collection and record entry.
- Tested software applications, identified issues, and reported findings.
- Delivered user training and ongoing assistance to support software adoption.

EDUCATION

BSc, Computer Science and Engineering 2020 – 2024

Southeast University

HSC, Science: Ideal College | 2017 – 2019

SSC, Science: Tejgaon Government High School | 2017

NUR MOHAMMED RAJIN

SELECTED ENGINEERING PROJECTS

Mizala — Commerce Platform

Next.js, Django REST Framework, PostgreSQL, Redis, Celery

- Custom storefront and administrative CMS covering product variants, search, checkout, order processing, and inventory.
- Cash-on-delivery and bKash payment flows, courier dispatch integrations, background tasks, and server-sent order events.

GOTI ERP — Business Operations

Next.js, React, TypeScript, Django service integrations

- Modular frontend for accounting, HR, inventory, project management, and procurement, integrating with separate backend services.
- Typed API clients support pagination, timeouts, and session refresh; reusable screens cover journals, vouchers, ledgers, and financial reports.

Goti — Vehicle Diagnostics PWA

Next.js, TypeScript, Highcharts, Leaflet

- Mobile-first vehicle interface for battery diagnostics, fuel and mileage, GPS tracking, and payment-related workflows.
- Source-aware vehicle identity, degraded-source handling, English/Bangla interfaces, and an offline fuel-entry queue.

FloorSight — Retail Floor Intelligence

Next.js, TypeScript, BLE data integration, interactive floor plans

- Multi-outlet interface combining staff positions, cold-chain asset telemetry, and interactive floor-plan views.
- Workforce reporting includes dwell heatmaps, zone coverage, and off-floor movement analytics.

Facility Control Dashboard

Next.js, TypeScript, Zustand, Recharts

- Unified interface for air conditioning, temperature sensors, lights, fans, and energy analysis, with staged commands and confirmation-guarded bulk actions.
- Clearly labeled last-known readings, chart table views, and spreadsheet export support operational review.

Toron — Distribution & Warranty

Django, React Native, Expo, SQLite

- Battery distribution and warranty workflows connect a mobile field app, manager portal, inventory, sales, and serial-number lifecycle tracking.
- Offline-first storage, queued actions, bidirectional delta synchronization, and FIFO checks support field operations.

Additional Web Work

Astro, Supabase, Cloudflare

- Asik’s World: static retail storefront, owner-managed catalog, and WhatsApp ordering workflow. Bilingual Studio Website: Bangla/English content-driven pages and storefront demos.
